August 2019 - May 2022

- Organizations: Sales and Trading Group, Relevant Coursework: Data Analysis with Python, Applied Calculus II

PROFESSIONAL EXPERIENCE

Accenture

New York, NY

Technology Sr. Analyst

December 2024 - Present

- Designed and deployed enterprise-scale financial and procurement system for Fortune 500 clients, automating reporting and routing workflows for 1,200+ users.
- Built AI-powered enterprise analytics applications using LLMS and APIs to automate reporting, surface business insights, and enable non-technical users to query financial data through a natural-language chatbot.
- Presented AI prototype to 60+ senior leaders as a potential client-facing offering to reduce manual reporting effort and accelerate enterprise insight generation.
- Partnered with cross-functional client teams to translate business requirements into Workday technical configurations and custom validations.
- Remediated supplier contract errors via Postman API to fix failed loads without full re-uploads, cutting recovery time and operational risk.
- Served as primary liaison to C-suite stakeholders, leading weekly status reviews and coordinating cross-functional execution.

Technology Analyst

September 2022 – December 2024

- Recognized with Accenture WOW Award (top 1%) for innovation and cross-team collaboration.
- Supported on-site Workday launch and change management for public healthcare organization.
- Led several workstreams (Projects and Budgets) for large enterprise insurance client; aligned configuration with performance and control objectives.
- Solved 300+ defects in a single implementation, improving stability, auditability, and stakeholder trust.

Keswick Vineyards

Keswick, VA

Data Analyst and Business Model Development Intern

July 2021

- Conducted research on competing markets (50+ companies) to optimize retail prices.
- Analyzed survey data from 1,000+ wine-club members to develop a new business model regarding wine types, prices and future events.
- Implemented new strategy to reach a younger market and increased margins by 30%.
- Managed venues and promotions through social media platforms to increase company awareness.

Ehrenkranz Partners

New York, NY

Client Service Administrator Intern

July 2020 - August 2020

- Collected data on 100+ clients to file class action lawsuit regarding stock prices.
- Generated reports on Excel using vlookups and pivot tables to analyze large data sets (4,000+ rows).
- Organized company-wide sub fund K-1's and private equity statements.

Vendefy LLC

New York, NY

Intern

July 2019

- Communicated with 3rd party software developers to ensure the app quality and user interface met expectations set by Vendefy and its beta-testers.
- Configured the design and development of the company website.
- Organized the launch of the beta-test with 50 users for the company's e-commerce application.
